AMENDMENT

Syracuse, New York February 25, 2002

Assistant Commissioner of Patents Washington, DC 20231

Sir:

Responsive to the Office Action dated January 24, 2002, kindly amend the application as follows:

IN THE SPECIFICATION

Amend the paragraph at page 1, lines 1-8 as follows:

In screw compressors the bores for the rotors overlap. The overlapping bores create cusps in the nature of the waist of a figure eight. One of the cusps is the normal location for one form of a mechanical unloader which forms a portion of the bore and coacts with the rotors as it moves axially in the cusp to unload and to control the Vi, or discharge volume to suction volume ratio, of the compressor. The unloader is normally driven by a solenoid. To provide a greater degree of control, it is common to provide a
